

ZEN
NUDE
SHOWER
PIVOT / SLIDING

La nuova versione di Zen è disponibile in due varianti **NUDE** e **SHOWER**:

- **NUDE**: un ambiente completamente coibentato, privo di colonna e seduta, progettato per l'installazione di generatori di vapore esterni.
- **SHOWER**: dotata di soffione integrato nel tetto, ideale per predisposizioni a muro già esistenti.

Entrambe le varianti si adattano a diversi contesti grazie alle configurazioni disponibili: ad angolo, a parete o in nicchia, con possibilità di scegliere tra porta battente o scorrevole. Le soluzioni possono essere installate direttamente a pavimento, su un piatto doccia Megius o su qualsiasi altro piatto doccia.

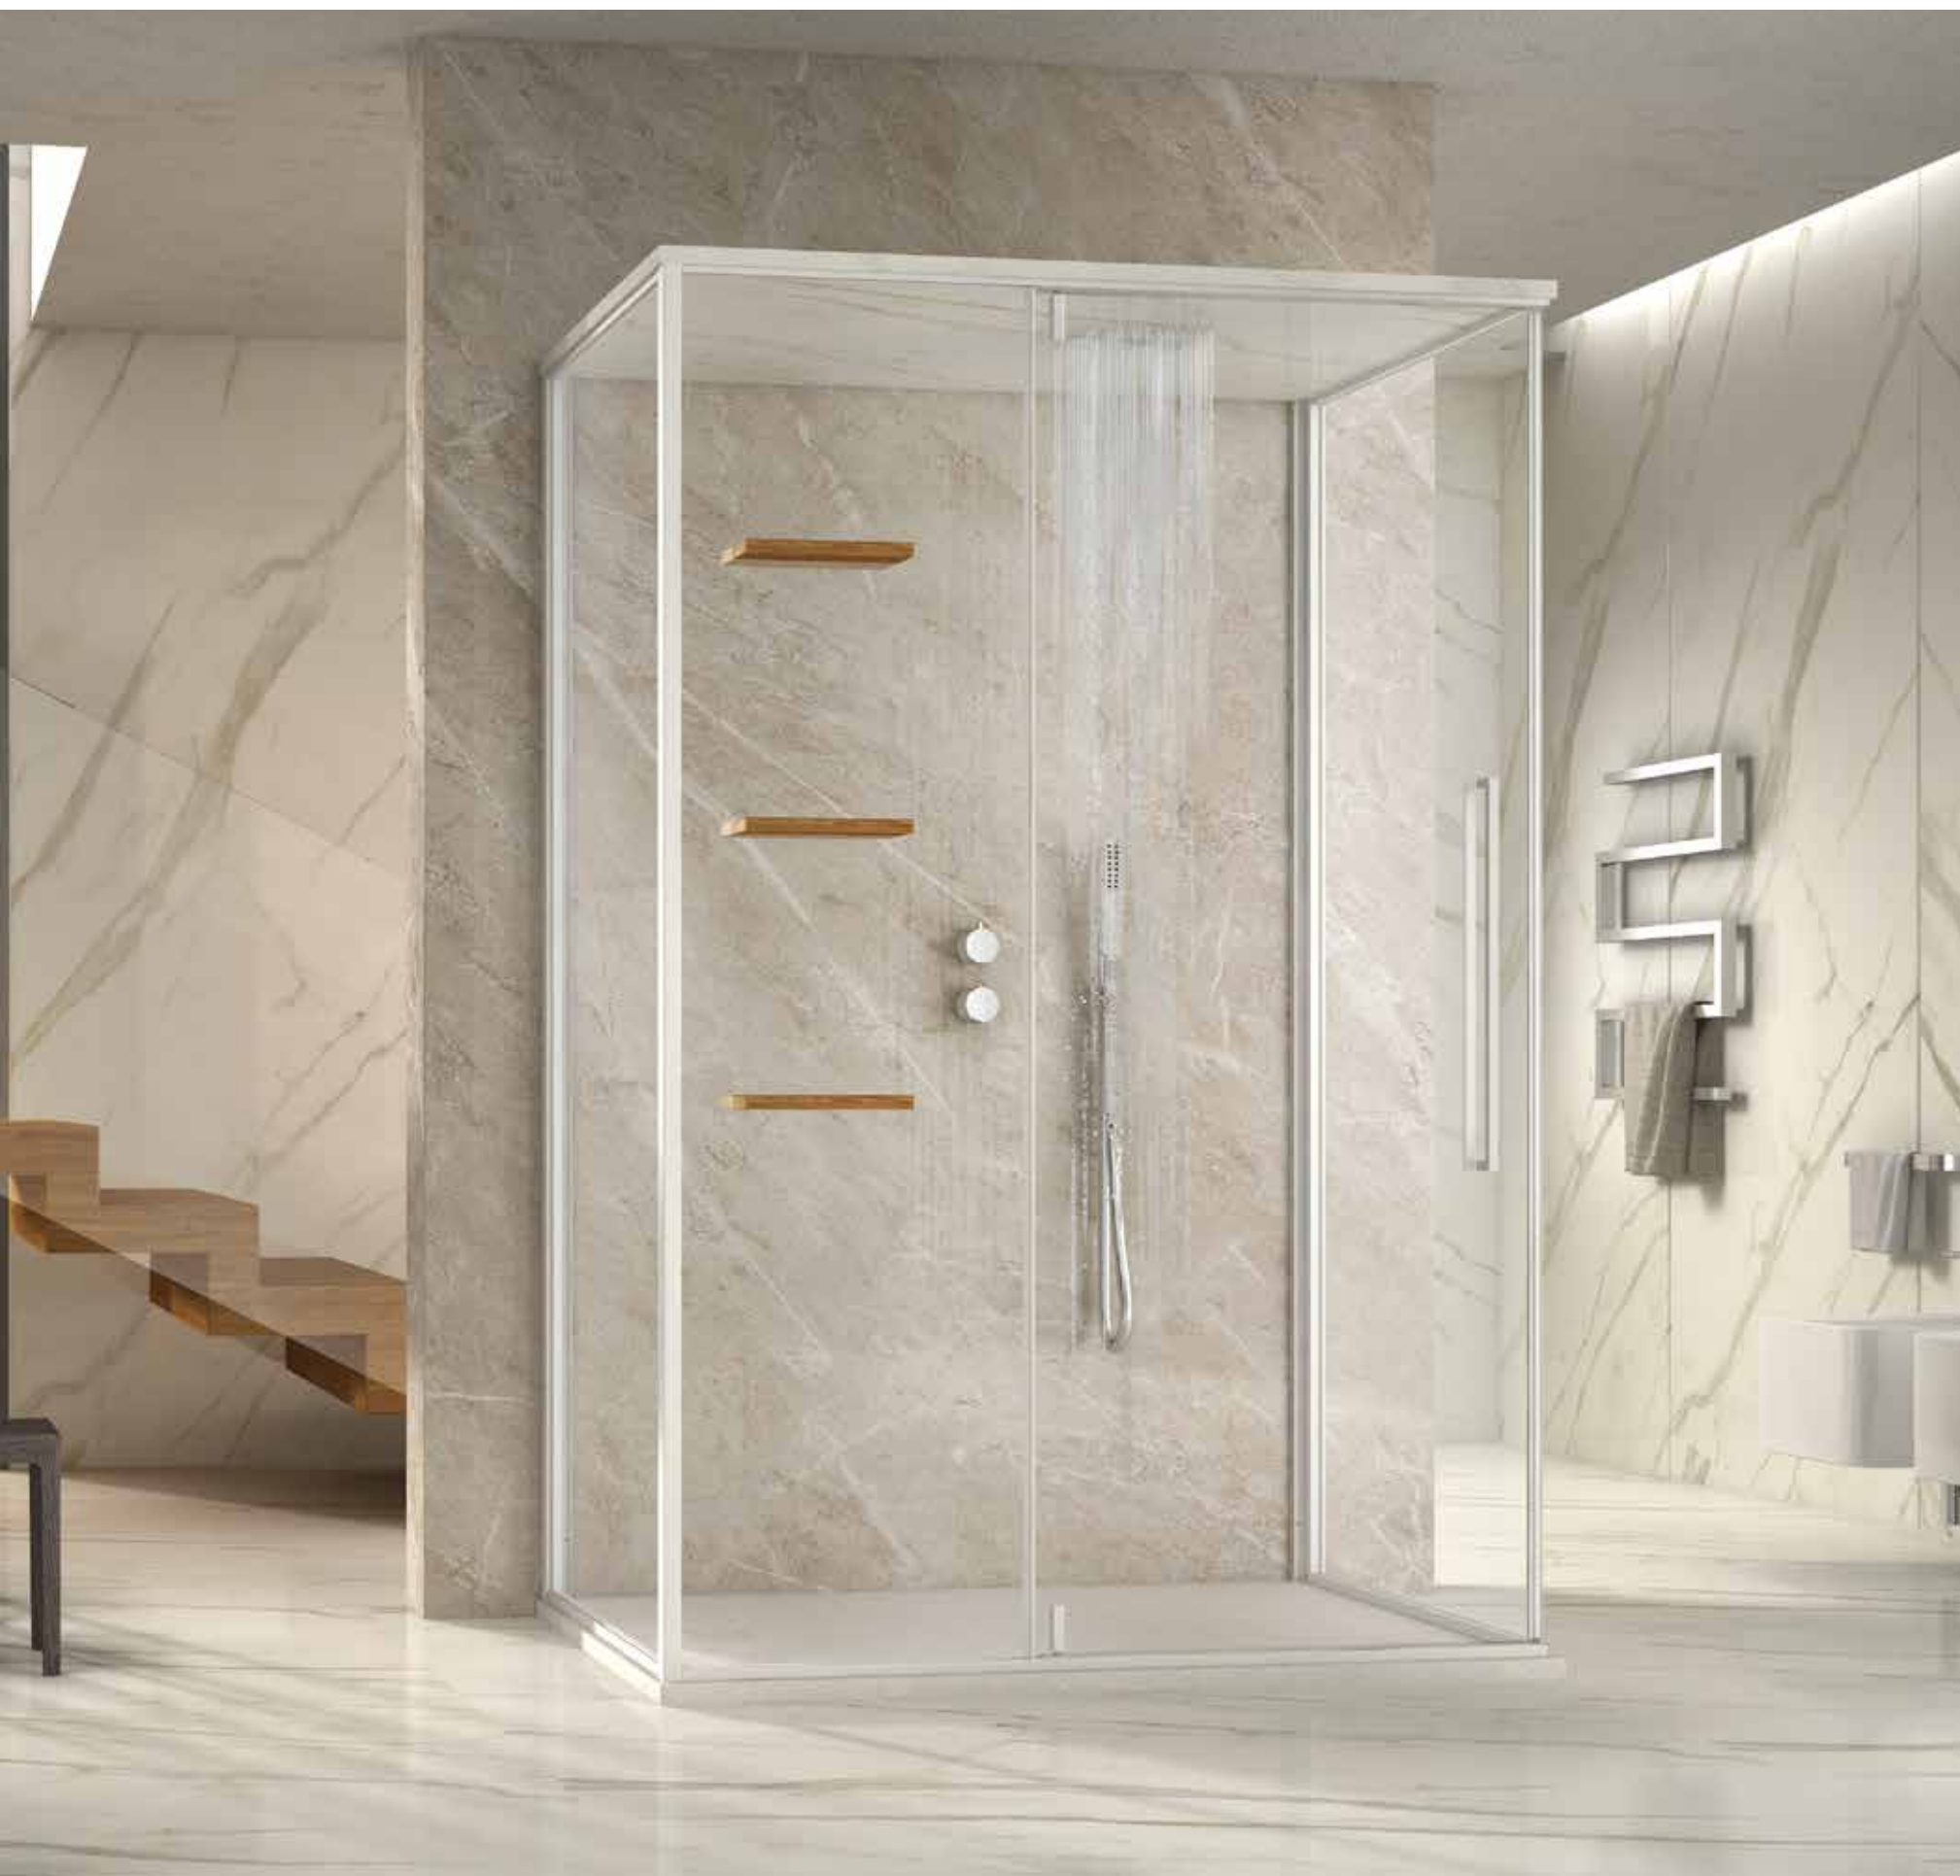

The new Zen version is available in two variants **NUDE** and **SHOWER**:

- **NUDE**: a fully insulated environment, without a column or seat, designed for the installation of external steam generators.
- **SHOWER**: equipped with an integrated overhead showerhead, ideal for pre-existing wall setups.

Both variants adapt to various contexts thanks to the available configurations: corner, wall-mounted, or recessed, with the option to choose between hinged or sliding doors. The solutions can be installed directly on the floor, on a Megius shower tray, or on any other shower tray.
